

## *Emergency Evacuation Training for Building Occupants*

# AFFORDABLE INSTRUCTION HAS NEVER BEEN EASIER

### *Emergency evacuation training for all occupants is the law*

Building occupants must be trained: to recognize alarm signals, on the procedures to be followed when the fire alarm system sounds, and on their responsibilities for fire safety.

This computer based training program for building occupant evacuation procedures will help your organization to:

- Comply with national and provincial codes and other standards and avoid increasingly heavy penalties for non-compliance with codes and standards.
- Prevent of bodily injury or death.
- Reduce property damage and productivity losses.

It will provide building occupants with the critical knowledge, understanding, and confidence they need to respond safely and effectively to emergencies.

- Prevention: Eliminate or reduce the degree of risk to the health, safety and welfare of the occupants.
- Preparedness: Develop the knowledge and capabilities of the occupants for an effective response before an emergency situation.

- Response: Teach occupants how to take action immediately to protect their health and safety. Their proper response will minimize property damage and enhance organizational recovery.
